We present this villa to be completely renovated, ideal for investors or for those looking to create their own custom villa in Jávea, in a quiet, established residential area that is in high demand.

The property sits on a large private plot and includes a main property and several outbuildings. The exterior features a private swimming pool, terrace area, and landscaped gardens.

The traditional-style house needs a complete renovation, allowing for a redistribution of spaces, modernization of finishes, and property to current standards, whether as a primary residence, a second property, or an investment property. Its spacious layout offers numerous design possibilities.
