Land a Plots in Malaga

€3,300,000

5	2	817m²	480,000m²	N/A

We are pleased to present this distinguished country property located in a privileged rural setting. This rustic house, part of a larger old manor house, offers a total land area of 480,000 square meters, characterized by its natural beauty and dryland farming soil, primarily dedicated to almond trees, olive trees, and carob trees.

The extensive land not only provides a tranquil and private environment but also presents an exceptional opportunity to expand and diversify agricultural production. With the possibility of increasing the number of trees in production, this estate offers significant potential for those interested in actively exploiting the land and increasing its agricultural yield.
